DADE, 1681,

A

Prognostication:

In which you may behold the  
state of this Present YEAR  
of our LORD GOD,  
1681.

Being the first after Bifertile  
Leap Year.

CONTAINING,

The Description of the Four Seasons,  
the Eclipses, the Passions of the Planets,  
and the Daily Inclination of the Air.

Also *Physical Verses*, and *Short Notes*,  
and *Rules* for Husbandry, for every  
Moneth throughout the Year.

With diverse other *Notes* and *Rules* of  
Good Consequence, not formerly Published  
in this *PROGNOSTICATION*.

By WILLIAM D A D E, Gent.

LONDON,

Printed by T. N. for the Company of  
STATIONERS. 1681.

A Prognostication.

A Description of the Four  
Quarters of the Year.

And First of *Winter*.

Sol in ♍, ♎, ♏.

**W**inter Quarter (after the *Astro-  
nomers* Account) began the  
Eleventh of *December*, 680.  
at 10 of the Clock in the  
morning, and continues till the 9th. of *March*  
this year 1681. So that alwayes the first part  
of the Astronomical Winter, is in one Politick  
year, and the latter end thereof is in the other.  
At which was the shortest day of the year, by  
reason of the Suns greatest declination from  
the Equinoctial Line.

This Season, of its own disposition, is known  
to be cold and moist, contrary to the quality of  
the Summer; and, in this quarter, the inward  
parts of Man are very hot, and being healthful,  
may receive plenty of Food, because natural  
heat is now comforted, and is gone inward,  
and there increaseth, and maketh digestion the  
better.

How the Weather will be therein disposed,  
is noted for each day throughout the Quarter.

The Sickneses whereunto this Quarter is  
most enclined, are *Rhumes, Gonts, Pusles, Sore-*

D A D E, 1681.

Eyes, Melancholy, Coughs, Catharrs, Sciaticas, Falling-Sickness, Diseases proceeding of Rotteness and Corrupt Humors; with divers kind of Infirmities incident among Women.

Of the Second Quarter of the Year,  
called the *Spring*.

Sol in ♋, ♌, ♍.

**T**He Spring time (being the most pleasant and wholesome Season of the Four) taketh its beginning on Wednesday the 9th of *March*, at 38 min. past 8 at night, when the Sun entreth into the first minute of the Equinoctial point *Aries*, making the dayes and nights of equal length; which quarter endeth the 10th. of *June*, when the Sun entreth into *Cancer*.

This season is naturally hot and moitt, and is of the Sanguine complexion, being the most temperate and healthful time of the year, and is therefore accounted the fittest time to ease diseased Bodies in, and to restore health again in those in whom formerly it hath been decayed by any kind of evacuation.

The particular condition thereof may be seen in the daily disposition of the Season.

The Infirmities of this Quarter are *Melancholy*, *Madness*, the *Falling-Sickness*, *Bleeding at the Nose*, *Horseness*, *Coughs*, *Itch*, *Scales*, *many Ulcers*, and small *Apothumes*, the *Gout*, and  
Pain

## A Prognostication.

*Pain in the Joynts, Plurifies, Dropsies, Pestilent Agues, Shortness of Breath; Fainings, Pain in the Head, Eyes, and Stomach, Rotten Fevers, and other Strange Diseases.*

### Of the Third Quarter of the Year, called *Summer*.

Sol in ♋, ♏, ♎.

**S**ummer (accounted the Third part of the Year *Astronomical*) taketh alwayes its beginning at the time of the Suns entrance into the first min. of the Solstitial Sign *Cancer*, which is this year on Friday the 10 of *June*, 50 min. after Midnight, at which time he makes his greatest declination from the Equinoctial towards the North, and causeth the longest day, and shortest night in the year; and so Summer holdeth on till the 12 of *September* following.

In this Quarter the Stomach cannot digest such hard Meats as it will in the Winter season, for that natural heat is now distributed into the exterior parts, and man is not now so hot within as in Winter.

As for the disposition of the Weather, you may see in the dail inclination.

The Sickneses at this time are divers, as, *Burning Agues, Plurifies, Frenchs, Hot Apoplexies, Divers pains in the Head, Sundry Inflammations, and New Infirmities*, proceeding especially of *Hot*

D A D E, 1681.

*Choleric Humours*, wherewith many will be  
fore molested.

Of the Fourth Quarter of the Year,  
called *Autumn*, or *Harvest*.

Sol in  $\epsilon$ ,  $\mu$ , 7,

**A** *Utumn*, or *Harvest* (being the Fourth, or  
last Quarter of the Year) beginneth up-  
on Munday the 12 of *Sept.* at 5 1 m. past 2 in the af-  
ternoon, the Sun then making his entrance  
into the first minute of the second Equinoctial  
Sign *Libra* working the same effect that he did  
at his entring into *Aries*, that is, making the  
dayes and nights of equal length, rising at six  
in the morning and setting at six at night; and  
this Quarter doth last until the eleventh of *De-*  
*cember* following

The quality of this Season is naturally cold  
and dry, yet, by reason of its mutability, it is  
the most unwholesome; by means whereof, it  
is more subject to sickness then any other: for  
the dregs of all diseases of the former parts of  
the year, will now break forth and be seen.

How the Air is like to be inclined all Harvest,  
may be seen in the daily disposition of the Sea-  
son.

The Diseases of this Quarter are like to be ma-  
ny and dangerous, as *Black Jaundies*, *Me-*  
*grims*, *the Falling-Sickness*, *Opilations in the Spleen*  
difficulty

## A Prognostication.

*difficulty of Breathing, Convulsion Fits, Dropsies, Sciatica's, Biles, Toothach, and many more. From which, good Lord deliver us.*

---

# OF THE ECLIPSES this Year, 1681.

**T**He Luminaries will be Eclipsed four times this year, the *Sun* twice, and the *Moon* as often. Of which one of the *Moon* will be visible to us.

The first of the *Moon* on the 22 of *February*, in the Forenoon, and so not to be seen.

The Second of the *Sun* upon the 10th of *March*, at 1 in the Morning, and cannot be seen.

The Third of the *Moon*, on the 19th of *April*, and may be seen of us, for

The beginning is at 40 m. after midnight.

The middle at 22 m. after 2 in the Morn.

The end at 4 min. after 4 in the morn.

The Fourth is of the *Sun* *September* the 2d, at 2 in the Morning, and so cannot be seen.

D A D E, 1681:

*Here followeth certain Physical Verses, with  
a Description how the Planets are placed in the  
Heavens, either before or after the Sun, where-  
by you may perceive how they keep their Motions  
Day and Night; Also the daily disposition of the  
weather: And short Rules for Husbandry,  
for every Moneth throughout the Year.*

Now cold December is come in,  
The poor Mans back is cloathed thin;  
Then Feed and Cloath him as you may,  
The Lord will it three-fold repay.

**The Conclusion.**

**T***He year now like the Hieroglyphick Snake,  
His rounding Tail into his Mouth doth take.  
Christmase is come, make ready the good cheer,  
Apollo will be frolick once a year :  
I speak not here of Englands twelve days madness.  
But humble gratitude and hearty gladness.  
These but observ'd, let Instruments speak out,  
We may be merry, and we ought no doubt.  
Christians, 'tis the Birth-day of Christ our King.  
And we disputing, when the Angels Sing.*

## A Prognostication.

### *Natural Prognosticks for the judgment of weather.*

**T**He following Notes for the judgment of the weather are such as are deduced from the Aspects of the Planets to the Moon, and among themselves: these here following, are such as are deduced from *Empirical Aphorisms*, Therefore

1. The resounding of the Sea upon the Shore, and the murmure of Winds in the Woods, when the Wind is not stirring, shew doth shew Wind to follow.

2. The obscuring of the smaller Stars foreshews Tempests.

3. When Stars seem to shoot, Wind comes from that Quarter.

4. If two Rainbows appear, Rain follows: but a Rainbow appearing after Rain signifies fair weather.

5. If the Sky be red in the morning, it is a sure token of Wind or Rain to follow, or both, for the vapors which cause that redness will soon be dissolved.

6. If the Sun or Moon look pale, look for Rain; if fair and bright, fair weather; if red, Wind.

7. If a dark Cloud be at Sun-rising in which the Sun is soon after hid, it will dissolve it, and Rain will soon follow.

8. If a Cloud appear, and afterwards Vapors are seen to ascend up to it, it portends Rain.

9. If the Sun appear in the East, greater than it usually doth, it is a sign of Rain.

10. If a black Cloud appear in the West about Sun-setting, it will rain that night, or the morning following.

11. If Mists come down from the Hills, or descend from the Sky, and settle in the Vallies, it promiseth fair and hot weather. Also Mists ascending in the evening from the Earth, or Water, shew a hot day to follow.

12. Water-Fowls, (as Sea-Gulls, Morehens, &c.) when they flock and fly together from the Sea towards the Shore. As also when Land-Fowls (as Crows, Swallows, &c.) when they fly from the Lands to the waters, beating the waters with their wings, foreshews Rain and Wind.

13. If the Circles about the Sun be red and broken, it portends Wind; if thick and dark, Wind, Snow, or Rain, and the same of the Circles about the Moon.

14. The Trefoil Grass, against Rain, swels in the stalk, and standeth more upright.

15. The Wincowpipe (growing in Stubble-fields) if you find it open in the morning, is sure of a fair day to follow.

16. Aches, Hurts, and Corns, do enrieve against Rain, Snow, or Frost.

17. Worms coming out of the Earth, Moles casting up the Earth, Fleas biting more than ordinary, are evident signs of rain to follow.

18. Solid Bodies, as Stone and Waincot, when they sweat, do foreshew Rain.

DADE, 1681.

*Natural Prognosticks of Pestilential,  
and unwholsome Years.*

1. **W**HEN there are great number of Frogs, Flies, Locust, &c. For these Creatures being ingendered of Putrefaction, shew a general disposition of the Year, and constitution of the Aire to Putrefaction.

2. When Worms are found in Oake-Apples.

3. Great and early heats in the Spring (and chiefly in *May*) without Winds.

4. Great drought in Summer continuing to the end of *August*, portend a Pestilenticus Summer the next year.

5. The Small Pox, Purples and Agues in the Summer, and hovering all the Winter, portend a great Pestilence the Summer following.

6. A dry *March* and a dry *May* portend a wholsome Summer, if there be a showering *April* between.

*Signs of a Sound and Pure Aire.*

1. A Sound and Pure Air is made hot presently after the Sun rising, and is made cold immediately after his setting.

2. That which yieldeth a pleasant smell after Rain, clear, and not evaporated, open and lightsome, and when the North-wind bloweth.

3. Where there are Easterly Winds in the Mornings.

*Signs of a Corrupt and Infectious Aire.*

1. A Corrupt and Infectious Aire is made by the often blowing of the South, or South-East windes;

## A Prognostication.

windes : or by the West, or South-west wind in the evening.

2. When the Aire is cold long after Sun-set.
  3. When the Aire is long hot after Sunsetting.
  4. When the Air is long close, cloudy, or thick.

### *Of the Properties, and Natural Effects of the Seven Planets.*

#### *Saturn.*

**S**aturn being well posited, is like a grave Counsellor, and a Man of authority thinking of great matters, a lover of Secrets, Diligent, Solitary, Covetous, Studious and a Zelotype — Being evil affected, he is an Abject, a Pick-thank, fearful, given to Solitariness, Sad, Stubborn, Ill-willy, Deceitful, Sloathful, Dull, a Lyar — By nature he hath relation to Husbandmen, Masons, Blacksmiths, Diggers in the Earth, Tanners, and the like

#### *Jupiter.*

**Jupiter** is said to be the greater Fortune, and of Nature is benevolent ; Being well situate, he maketh men honest, prone to good duties, pious, magnanimous, vericundious, modest, wise, diligent, liberal, and yet careful of their own — Being evil disposed, he is more prodigal and stout — He signifies, Bishops, Church-Governours, Lawyers, Judges, Governors of Towns and Cities, and Ecclesiastical Persons.

#### *Mars.*

**Mars** being well-affected, is valiant, generous, hasty, given to War, fearing no danger, impatient

## DADE, 1680.

patient of servitude, and injuries, not respecting riches — But being badly seated, he is ireful, cruel, prodigal, a tyrant, a murderer, and the author of discords and seditions — He hath relation to Soldiers, Surgeons, Turks, Fire-works, &c.

*Sol.*

He is magnanimous, valiant, provident, a giver of long life, and a healthful body — He maketh Men wise, famous, desirous of honors, having signification of Kings, Princes, Dukes, Marquesses, Earls and Potentates.

*Venus.*

*Venus* being well situate, maketh men fair spoken, pleasant, fair, delicate in gesture, given to pleasures, sociable, merciful, &c. — But being ill affected she is effeminate, timorous, a lover of Maids, sluggish, lustful, a Zelotype, and given to idleness.

*Mercury.*

*Mercury* being well seated, causeth a sharp wit, maketh men studious, and capable of Learning — Being ill seated, he is subtle, crafty, malicious, and a Lyar — Of Persons, he signifieth Philosophers, Poets, Mathematicians, Scriveners, Merchants, and the like.

*Luna.*

The Moon maketh men unconstant, fearful, prodigal, studious of Histories, and given to Navigation and Planting — She signifies Embassadors, Legates, Queens, Ladies, also Common People, Fishers, Watermen, and such like.
